Dear Sir or Madam:

Thank you for registering with the Camp Lejeune Historic Drinking Water Notification Database. The purpose of the Database is to help us identify and inform individuals who may have lived or worked aboard Marine Corps Base Camp Lejeune, in or prior to 1987, of potential exposure to contaminated drinking water which has been associated with the Base. We want to ensure those who may have been exposed are provided with the most up to date information regarding the past water quality aboard the base.

The Department of the Navy is funding health studies in an effort to determine when the drinking water was first impacted (recent studies currently provide a best estimate of 1953), who may have been exposed, and whether or not there may be any association between exposure to the water and certain health conditions.

Please visit our website www.marines.mil/clwater for complete details regarding the notification database, on-going studies, and other information. You may also call our toll-free information line, (877) 261-9782, to speak to a representative who can assist you with questions and concerns, or contact us by e-mail at clwater@usmc.mil.

We want to ensure the widest dissemination of information to our Marine Corps family. If you know any former residents or employees based at Camp Lejeune in 1987 or prior, please encourage them to register.

Sincerely,

C. L. HUDSON

Major General, USMC

Assistant Deputy Commandant

Installations and Logistics (Facilities)
