

EMERGENCY NUMBER: 1-800-492-4009

About Elizabethtown Gas

Elizabethtown Gas transports and delivers natural gas to more than 300,000 customers in parts of Union, Middlesex, Sussex, Warren, Hunterdon, Morris and Mercer counties. Elizabethtown Gas helps heat homes, warm water and run appliances through a carefully managed network of transmission and distribution pipelines.

What does Elizabethtown Gas do if a leak occurs?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak, Elizabethtown Gas will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to

protect life, property and the environment in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

Maintaining safety and integrity of pipelines

To ensure that Elizabethtown Gas can properly operate and maintain our pipelines safely and in compliance with Federal and State regulations, we need to maintain a clearance within the right of way (ROW) on either side of a pipeline.

Elizabethtown Gas establishes written agreements with landowners to allow for ease of construction and maintenance when natural gas pipelines cross private property. Disturbances and obstructions within the ROW make it difficult for Elizabethtown Gas to prevent third-party damage, provide surveillance and perform maintenance and inspections.

PRODUCTS TRANSPORTED IN YOUR AREA

PRODUCT	LEAK TYPE	VAPORS
NATURAL GAS	Gas	Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.
HEALTH HAZARDS	Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.	

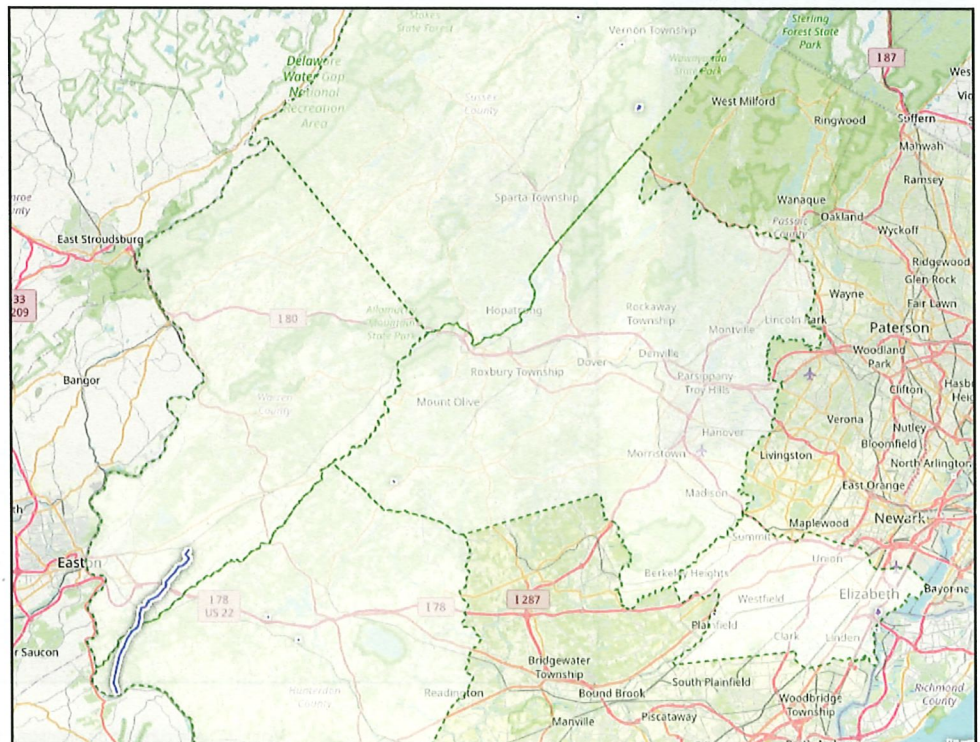

How to get additional information

To learn more about pipeline safety and other important gas safety information visit elizabethtowngas.com/safety or contact us at 1-800-242-5830.
